TITLE : INFORMATION-REPRODUCING
APPARATUS

ABSTRACT : PROBLEM TO BE SOLVED: To provide an information-reproducing apparatus which can select the desired program information easily and in a short period of time from a plurality pieces of program information recorded to a recording medium without forcibly giving an excessive burden to an operator.

SOLUTION: In this information reproducing apparatus, an index video information of each program recorded to a disk type recording medium 4 is obtained and it is then displayed as a list on a display device 2 and the program may be selected by instructing the selection of index image displayed in this list. Thereby, the desired program information can be selected easily within a short period of time from a plurality pieces of program information recorded to a sheet of recording medium.
